# **Advanced Molecular Quantum Mechanics: An Introduction To Relativistic Quantum Mechanics And The Quantum Theory Of Radiation (Studies In Chemical Physics)**

## Synopsis

This book is primarily intended for graduate chemists and chemical physicists. Indeed, it is based on a graduate course that I give in the Chemistry Department of Southampton University. Nowadays undergraduate chemistry courses usually include an introduction to quantum mechanics with particular reference to molecular properties and there are a number of excellent textbooks aimed specifically at undergraduate chemists. In valence theory and molecular spectroscopy physical concepts are often encountered that are normally taken on trust. For example, electron spin and the anomalous magnetic moment of the electron are usually accepted as postulates, although they are well understood by physicists. In addition, the advent of new techniques has led to experimental situations that can only be accounted for adequately by relatively sophisticated physical theory. Relativistic corrections to molecular orbital energies are needed to explain X-ray photoelectron spectra, while the use of lasers can give rise to multiphoton transitions, which are not easy to understand using the classical theory of radiation. Of course, the relevant equations may be extracted from the literature, but, if the underlying physics is not understood, this is a practice that is at best dissatisfying and at worst dangerous. One instance where great care must be taken is in the use of spectroscopically determined parameters to test the accuracy of electronic wave functions.

## Book Information

Series: Studies in Chemical Physics

Paperback: 300 pages

Publisher: Springer; Softcover reprint of the original 1st ed. 1973 edition (November 11, 2011)

Language: English

ISBN-10: 9400956908

ISBN-13: 978-9400956902

Product Dimensions: 6.1 x 0.7 x 9.2 inches

Shipping Weight: 1.1 pounds (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #6,372,526 in Books (See Top 100 in Books) #97 in Books > Science & Math > Chemistry > Chemical Physics #4639 in Books > Science & Math > Physics > Quantum Theory #28913 in Books > Textbooks > Reference
