Introductory Chemistry (5th Edition) (Standalone Book)

Synopsis

NOTE: This book does not come with Access Code See how chemistry is relevant to your life Now in its fifth edition, Introductory Chemistry continues to foster deep engagement in the course by showing how chemistry manifests in your daily life. Author Nivaldo Tro draws upon his classroom experience as an award-winning instructor to extend chemistry from the laboratory to your world, with relevant applications and a captivating writing style. Closely integrated with the fifth edition of Introductory Chemistry, MasteringChemistry gives you the tools you need to succeed in this course. This program provides you a better learning experience. It will help you to: Personalize learning with MasteringChemistry: This data-validated online homework, tutorial, and assessment program helps you quickly master concepts, and enables instructors to provide timely intervention when necessary. Achieve deep conceptual understanding: Several new Conceptual Checkpoints and Self- Assessment Quizzes help you better grasp key concepts. Develop problem-solving skills: A step-by-step framework encourages you to think logically rather than simply memorize formulas. Additional worked examples, enhanced with audio and video, reinforce challenging problems. Maintain interest in chemistry: The inclusion of concrete examples of key ideas throughout the program keeps you engaged in the material. Note: If you are purchasing the standalone text or electronic version, MasteringChemistry does not come automatically packaged with the text. To purchase MasteringChemistry please visit: www.masteringchemistry.com or you can purchase a package of the physical text + MasteringChemistry by searching for 9780321910073 / 0321910079. MasteringChemistry is not a self-paced technology and should only be purchased when required by an instructor.

Book Information

Hardcover: 840 pages

Publisher: Pearson; 5 edition (January 11, 2014)

Language: English

ISBN-10: 032191029X

ISBN-13: 978-0321910295

Product Dimensions: 8.7 x 1.5 x 11 inches

Shipping Weight: 4.8 pounds

Average Customer Review: 4.1 out of 5 stars 423 customer reviews

Best Sellers Rank: #2,653 in Books (See Top 100 in Books) #13 in Books > Science & Math > Chemistry > General & Reference #17 in Books > Textbooks > Science & Mathematics >

Customer Reviews

Nivaldo Tro is currently chair of the department of chemistry at Westmont College in Santa Barbara, California, where he has been a faculty member since 1990. He received his B.A degree in chemistry from Westmont College and earned a Ph.D. in chemistry from Stanford University, for work on developing and using optical techniques to study the adsorption and desorption of molecules to and from surfaces in ultrahigh vacuum. He then went on to the University of California at Berkeley, where he did post-doctoral research on ultra-fast reaction dynamics in solution. Since coming to Westmont, Professor Tro has been awarded grants from the American Chemical Society Petroleum Research Fund, from Research Corporation, and from the National Science Foundation to study the dynamics of various processes occurring in thin adlayer films adsorbed on dielectric surfaces. Honored as Westmont's outstanding teacher of the year in 1994, 2001, and 2008, he was also named the college's outstanding researcher of the year in 1996. Professor Tro lives in Santa Barbara with his wife, Ann, and their four children, Michael, Alicia, Kyle, and Kaden. For leisure, he enjoys reading, writing, snowboarding, biking, and other outdoor activities with his family.

sigh Bought the rental version of this book on , because it was the same as the hardcover and thus not as heavy. Of course it does not include the all important access code which you need to pass any college class these days. So as a result I have just tossed another \$80 down the proverbial drain. Michael: But since you bought the kindle edition I do believe that it only comes with the book version for the kindle As always, buyer beware, DO NOT BUY THE KINDLE VERSION OF THIS BOOK. YOU WILL BE SCREWED.

This product was supposed to come with access card for mastering chemistry with etext and there is no access card I would have gotten the cheaper one if I had known it wasn't going to come with it. Very disappointing

I thought it came with the access code WITH etext as the description on the headline to this product indicates. Except i only got a rental hard cover text book. So if you are a poor student who needs the mastering chemistry access code DO NOT BUY THIS PRODUCT YOU WILL GET NO ACCESS CODE OR ETEXT. You will probably spend more then just buying from the pearson website itself.

Very disappointed.

This version is said to have Mastering Chemistry, however, ended up having to purchase Mastering Chemistry through Pearson. This version comes with the Into to Chem book only.

Tro's 5th edition is integral to learning the material presented in lecture, sometimes I actually ended up learning a little more from the book! This one I'm not getting rid of, I plan to use it for review... My mom's got a bachelors in Biology/Bio-chem and finds this book awesome to look through. Very pleased with this text book, and I almost never say that about anything I pay this much for.

Didn't come with the access card like it stated and was paid for. Takes another \$70 to get access or \$120 for etext and access. Ridiculous.

I gave it 3 stars as I purchased this book because it was NEW and then would include all that I need for my chemistry class. This was not the case! This New book did not have the accessory kit that is included with all NEW books purchased of this kind. If I didn't need the accessory kit then I would have purchased a Used book for \$3.99! It is going to cost me another \$44.50 to purchase the accessory kit separate. If the book did not include everything that comes with a NEW book, then that should have been stated.

This book is easy to understand and the author's explanations are the best I've found in any book. The "level" is lower than most university general chemistry books. This text might be used at a community college or an AP level high school class. Unlike most general chem books this one is easy to read! I gave this book five stars because it does what it sets out to do. Get this book if you are a self learner or maybe if you are taking general chem and need a second book that is easier to understand. Read the explanation in this book. Then you "get it" and then go to the bigger textbook for more details. There are MANY practice/homework problems. More than in most books and the odd ones have answers.
