Tanks And Armored Fighting Vehicles Visual Encyclopedia

Synopsis

Since World War I weapons of war have become increasingly more sophisticated as industrialisation and computerisation have taken hold in weapons design and manufacture. "Armoured Fighting Vehicles Visual Encyclopedia" is a directory of more than 1000 of the finest tanks, jeeps, trucks, tank destroyers, wheeled and tracked infantry vehicles, amphibious vehicles, engineer vehicles, self propelled artillery and armoured cars built in the last 100 years. Arranged chronologically, the book provides a comprehensive visual guide to the development of 1000 of the most interesting armoured fighting vehicles that have seen service. Each featured vehicle is illustrated with an excellent full-colour artwork in profile or three-quarter view, showing in great detail the features of the vehicle and the different colour schemes used for different marks or for vehicles used in different theatres of war. Among the vehicles featured are such major names as the Abrams, Sherman, Panzer and T-34 tanks, and many more. With 1000 outstanding colour artworks, "Armoured Fighting Vehicles Visual Encyclopedia" is an authoritatively researched book that will be of interest to any followers of modern military history or land warfare. It features more than 1000 armoured fighting vehicles from around the world. It includes more than outstanding 1000 detailed profile and three-quarter view colour artworks. It is arranged chronologically and by theme to give a historical overview of the development of fighting vehicles over the past century.

Pretty nice encyclopedia of vehicles, nothing much else I can say. (Drawings were nice perhaps?)

A good big basic reference chock full of entries (over 2000 vehicles and their variants). Condition was as described, "good"- somewhat worn but fully serviceable. And it arrived yesterday the 19 of Sept well ahead of est. shipping. Yay.

Highly recommended to anyone fascinated with the different types of tanks or fighting vehicles. I had just seen a small clip on U.S. tanks, prior to WWII or 1942 and was curious what we were using for training tanks. This gives you very valuable information of each nationalities tanks and when they were in use.

Bought this as a gift. It's thick and loaded with color illustrations of what seems like every armored vehicle built from 1905 through 2009. Very well-done.

Great book for my hubby who suffers from apraxia and apraxia of speech. Uses the pics to help him build models.

It is a good history of AFVs with good to fair illustrations. If they were going to go all art work instead of photographs, why not constant scale three views, like Jane's, that are much better carriers of

information.

This book is freakin amazing... I don't know how they did all this work.

very informative
