Inorganic Geochemistry (Pergamon International Library Of Science, Technology, Engineering & Social Studies)

Synopsis

A quantitative treatment of fundamental geochemical processes explaining the principal chemical factors controlling element distribution in the Earth and Moon. Part one defines the chemical composition and nature of the Earth, Moon and meteorites and describes theories of element formation showing the compositional framework within which geochemical processes operate. Part two covers the chemical principles involved in element distribution in igneous and metamorphic rock systems, the behaviour of elements in these rocks and discusses the uses of isotopes in problems of petrogenesis and ore genesis. Part three deals with the geochemistry of continental and oceanic waters and includes rock - water interaction.

Book Information

Series: Pergamon International Library of Science, Technology, Engineering & Social Studies

Hardcover: 353 pages

Publisher: Pergamon; 1st edition (August 13, 1982)

Language: English

ISBN-10: 0080204481

ISBN-13: 978-0080204482

Shipping Weight: 1.7 pounds

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #882,160 in Books (See Top 100 in Books) #112 in [Books > Science & Math > Chemistry > Geochemistry](#) #1555 in [Books > Science & Math > Earth Sciences > Geology](#) #2341 in [Books > Textbooks > Science & Mathematics > Earth Sciences](#)

Customer Reviews

This book should rapidly replace all other geochemistry texts on the typical undergraduate book list. British Book News...a highly recommended and good value book. OUGS Journal

bought it as an additional reading for a course. now that the prof is a big wig, i assume the book is very good
