Customer Reviews

Written by Kathryn Jewitt, illustrated by Fiametta Dogi

Grandsons enjoyed looking at it, and searching pictures for sea life. My bad. I thought it was a pop up. It isn't. It's 3 D, and I didn't understand that.

Amazing book! My 4 year old still thanks me for getting this for him for his birthday. We have the rainforest one, and he asked for the ocean one for his birthday, and he was more excited to receive this book than the other toys! Vivid colors, and the pop-outs are wonderful. The only problem, not all the fish are labeled or discussed. The more we read it, we've found a couple fish, that a notable

enough my 4 year old to point out and inquire about, but nowhere mentions what fish it is. Love that most of the fish on the pop out pages, have a little box with a "fun fact." My son knows more about the "Angler fish" than I do!

Grandson opened at his bday party and all his 2nd grade buddies were just as excited as he was!

We have the entire 3-D Theater series of books and my son loves all of them, but this one is without a doubt his favorite in the series. I've been reading it to him for over a year now. We read it so much that the book is in tatters, which is my only complaint. These books fall apart fairly easily. Once the spine starts to go, the whole book starts to fall apart. I just added this one to my cart to buy as a replacement for the one that fell apart. Still worth 5 stars despite its construction.

Absolutely love this book. Bought for my son to reinforce the ocean animals that he was being taught at school. Love that the book is a pop up bring the animals to life. My son loves to read the book and learn about the different animal species that live in our oceans. My son is 3 years old.

My 3 year old is completely fascinated with these books and we just got 3-D Ocean which we read several times a week. He loves to find the creatures in the 3D pop ups and now wants me to read the little bit of info given about them on the sides as well. He can recognize and name so many creatures because of these books. I love all the 3D Theater books. They are beautiful to look at and fascinating no matter what your age.

No "shipwreck and its fabulous treasure" as in description, but very well done and informative. Pop-up pictures: Coral reef, open ocean, ocean's depths and frozen ocean. Coral reef is very colorful, everything else - not so much. But the text sites are also very good with pictures and interesting facts. My 4 year old loves it.

Absolutely wonderful! Beautiful and colorful pictures of all sorts of animals of the ocean. Our kids enjoyed this so much and they have so many questions that we rarely have time to complete the book in one sitting. Excellent book!
