Recycled Science: Bring Out Your Science Genius With Soda Bottles, Potato Chip Bags, And More Unexpected Stuff

Synopsis

Why recycle cardboard tubes, plastic bottles and jugs, craft sticks, and snack bags when you can reuse them yourself? These fun and informative science experiments and projects will keep readers entertained as they learn about scientific principles.

Book Information

Series: Recycled Science

Paperback: 112 pages

Publisher: Capstone Young Readers (August 1, 2016)

Language: English

ISBN-10: 1623706971

ISBN-13: 978-1623706975

Product Dimensions: 6.9 x 0.4 x 8.9 inches

Shipping Weight: 10.4 ounces (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars 7 customer reviews

Best Sellers Rank: #231,526 in Books (See Top 100 in Books) #21 in [Books > Children's Books > Science, Nature & How It Works > Recycling & Green Living](#) #142 in [Books > Children's Books > Science, Nature & How It Works > Experiments & Projects](#) #3654 in [Books > Children's Books > Activities, Crafts & Games > Activity Books](#)

Age Range: 9 - 15 years

Grade Level: 3 - 4

Customer Reviews

Tammy Enz became a civil engineer because of her awe of the massive steel bridges that spanned the Mississippi River. She just had to figure out how they worked. Today, she still likes tinkering and figuring out how things work. When she isn't tinkering, she fixes up old houses and conducts experiments in her garden and kitchen. Most of all, she loves reading books about anything and everything and asking 'why?' Jodi Wheeler-Toppen is the author of more than 10 books for children and teachers. She holds a PhD in science education from the University of Georgia. She lives in Atlanta, Georgia, with her family. When she's not doing science with children or teachers, she's trying to build a whatcha-ma-jigaroo out of spare parts. It will surely be a remarkable device (if she can ever get it to work)!

Purchased for grandsons ages 10, 7 and 5. They haven't received it yet as I've been gathering the

supplies to make a "kit" so they won't have to search for materials. It looks fun.

Such a cool idea book if you're looking for projects to do with kids.

Great projects! My husband, daughter and I had a lot of fun with these.

Good book!

Awesome resource!!

Do you like science, but do not have the fancy microscopes and stuff for big projects? Do you have spare spoons, potato chip cans, and other so-called "trash" lying around? Well, good news for everyone out there! The book *Recycled Science* by Tammy Enz and Jodi Wheeler-Toppen combines science and household products to make amazing things, from a solar hot dog cooker to your very own lava lamp! In the first chapter, you learn how to make things like a bow and arrow with Popsicle sticks. In the second chapter, you learn how to make things like an ice cream maker with snack packets (potato chip tubes, snack bags, etc.). In the third chapter, you can make a vinegar rocket and other stuff with bottles of water or milk jugs. And finally, the last chapter lets you make stuff like a marshmallow shooter out of cardboard tubes. This book grabbed me. It was really interesting. I would probably give this book 5 stars. That is actually rare for me because I am not the biggest fan of science. However, this book was really cool. I plan on doing some of these tests. In fact, some of the things that you do require only 1 thing! I never knew that you could do so much with trash! So, to sum it up, this book is great for anyone who wants to do an extremely fun and cheap project, or any science lovers in general! Scott W., 11, Central South Carolina Mensa

This book contains fun science experiments for children to do that use some recycled materials along with other materials. The instructions include helpful tips and "reusable knowledge" which explains the science behind the experiment telling how and why it does what it does. I think that children will enjoy the simple experiments and the book will make a great addition to homes and schools and libraries. I received this book free to review from Netgalley.
