Customer Reviews

This book is interesting. Its not a queesy pick up line book. Its basically a guideline to help relationship. An advice book. There are some good tips and advice in the book, but note everyone is different. This book may not be helpful to all. But I feel everyone can learn a great deal from this book.

Wow! This is such an amazing book ! I have been in a relationship for 8 years, and it seems like i've lost ways to reconnect with my fiancé, rather it be through body language, to conversation. This book gives great tips on how to regain our relationship in a sensual way. Seems like over time, some of that stuff fades away. It is a great book for those who are out of the dating game, or are in a relationship but would like to learn how to keep that relationship connection. If your in a similar situation, i recommend you to read this book as soon as possible, great tips and ideas!

This book is awesome. I was into one guy for about a year and I couldn't attract him no matter what I did. With the help of this book and author's great tips that were given here, I was finally able to fully take over his mind. We had a couple of dates already and we're getting closer and closer. Last date ended with a kiss and I just can't believe my luck for finding this book. **WOMEN NEED THIS!**

I have never actually asked someone out before yet when I found someone that I got along with well I decided to pickup some tips from this book to help me make the first move, it greatly helped with confidence and gave me some helpful tips that I used and now I have a date on Saturday. I'm really glad about that and I owe it to this book, it gets 5 stars from me.

This book has helped me learn how to attract people into my life. I recommend this book for anyone who has problems finding a significant other. I also like that this book was written by someone that is well versed in his field of work. Even if you already have a man it is always good to keep up with how to keep the man in your life interested.

I never truly knew how somebody ought to date, I generally did something that I saw or heard before and if never truly lived up to expectations. With an assistance if this astonishing book I have taken in the hypothesis of dating and with the enormously clarified tips I have possessed the capacity to date more lastly I got a cherishing relationship.

Ok, hello just the front of the book was enough for me! Lol But seriously, I am married yet found that this was such a blessing!! Based first of all, by a psychology professional. This book talks about the attraction of men and women. So then I could not put it down because even in my day to day activities with my husband i have a hard time with conversation and my body language, then turn offs and tips to make him crazy.. because even us married people need tips! I would strongly suggest this book to anyone, single or married so that you can increase your marriage by tips like your body language, according to a social psychologist. Note, your first impression even like I said being married I want to have that attraction when my husband comes home from work and I'd like to have the turn off and tips to make him crazy to liven up our marriage. So like I said, this was definitely helpful for me and I would strongly suggest it to anybody! :-)

Disclaimer, I was not paid to write this review I was given a sample to write my honest opinions and suggestions. :)
