Summary: Thinking Fast And Slow: In Less Than 30 Minutes (Daniel Kahneman)

Synopsis

Thinking Fast and Slow by Daniel Kahneman | Book Summary In this book, you'll learn how your mind comes to a conclusion based upon previous results and statistics. You'll learn how to better control your emotions and how to judge why you make the decisions you do. For example, you might find that whenever you think about a friend you'll think of a particular memory related to that person. You'll learn in this book that this is an automatic reaction of System One, and then System Two analyses the memory to remember the conversations or exact experiences. This book, if interpreted correctly, will teach you to have a greater level of understanding about yourself so that you can judge why you say, think, and do, providing insight into the things you do in various scenarios. Wow. Pretty slim. The cover states, "...in less than 30 minutes" My sense is that it could read, ...in less than 30 seconds..... Frankly, this is a poor substitute for a "cliff notes" type of summary that I

expected. Not enough to provide any meaning. So, why bother with it. Might as well get the book and skim read.

Quick reading

Everyone wants to be success in life but the real one is who know the dealing. This book describes the art of deal. Dealing is easy but techniques are required for. I found this book, explains each and every term quite impressive and easy that everyone can easily understand. It is not only easily understand but also easy to follow.

I was assigned to make an essay about this book in our English class. Not that I am cheating, I already have read the entire original book but there are some things that I still don't understand and I am on a hurry. This book indeed helped me a lot. It made the book more easy to read and faster. I can now write the essay. Thanks for this.

The summary book does a great job in preparing the reader to become independent and a decision maker in doing business and most importantly making that deal happen. I borrowed a copy from the book from my Tutor but I got real value from the book, it puts you in the thinking situation and as well makes you have an independent thinking.

Cliff Note version. The points of each chapter are made in easy format

This book shows how the mind works and how you can control your emotions much better. There is lots of evidence suggesting that we act based on previous experiences, which is book explains. This is a great summary of a great book and saved me a lot of time!

Looking back to when this was written it's like a script for our new president.
