The Intelligence Of The Cell Salts That Build The Human Body And The Plant

Synopsis

2014 Reprint of 1920s Edition. Full facsimile of the original edition. Undated short pamphlet by Carey printed in the 1920s. George Washington Carey (1845-1924) was an American physician known for his 'chemistry of life' publications, a subject which he referred to as biochemistry. Carey combined a mixture of religion, astrology, physiology, anatomy, and chemistry, themed particularly with a mineral-based theory of human disease to explain his views on human chemistry. He continues to be popular within new-age and homeopathic circles. In the context of a person viewed as a "human molecule", Carey was the first to state that a person's body is a "chemical formula in operation." This very short essay is a statement of the principles of his philosophy of the cell salts.

Good info! I hadn't realized the value of Cell Salts. Now I take them every day faithfully! My mind is much clearer!

Lots of information Thank you.

Very interesting a thought out information! It is very short in pages but the information in it is amazing.

Gives background about cell salts that I hadn't known.

5.3 pages only - more of a religious brochure or high school book report, than a real book that gives valuable information on salts. Any "facts" are not cited or backed up with scientific references. The only references are from the bible. The cover is a nice abstract art piece, but sadly, that's the only thing I liked about this item. It's a short essay, with no science-based info to sink the teeth into.

another winner from Mr Carey.

I love it
