Backcountry Roads: Idaho

Synopsis

Idaho's backcountry wilderness is renowned for its stark beauty. Remarkably, some of the state's most beautiful sites are easily accessible for the road traveler who is willing to drive the backcountry logging and forest service roads that few have cataloged. Brother and sister team Lynna and Leland Howard have spent years doing just that. With more than 114 photographs, 33 color maps, 31 detailed expeditions complete with GPS coordinates, *Backcountry Roads Idaho* is an indispensable companion for the road explorer.

Customer Reviews

Stunning work, as always, from Idaho's favorite writing and photography team! Leland's photos are bold and breathtaking. Lynna's prose is precise, yet fluid. My brothers and I have yet to work this well together! --Kitty Delorey Fleischman

Lynna Howard is an award winning poet and Leland Howard's beautiful nature photography has been recognized as amongst the best in the region. With several books and numerous calendars and other projects under their belt, the brother and sister team have brought to the page their love of their native state of Idaho.

Excellent review of the back country roads with the GPS readings and whether 2wd or 4wd drive is

required to travel the roads.

I'm planing on two of her ventures in August 2017

This book will quickly earn a prominent place in your armchair browsing library, but you may want to buy two copies. One to showcase and another to use and abuse while exploring. Stunning photography pulls you in, and then, you find more - much more. Explicit directions guide the adventurous to experience well chosen remote destinations with confidence. Background information covering history, geography and geology provides an intellectual foundation that can transform a quickly forgotten weekend road trip into a cherished memory. Highly recommended.

This is a beautiful book, that's well written and easy to follow their directions on the trails. The book would be awkward to use while navigating, and would be better used to plan ahead, and then leave at home.

As advertised.

In excellent condition; content seems exceptional (ask me after I visit Idaho!).

Really good

Good travel recommendations, great pictures and descriptions, even has GPS coordinates! Although I have not used it yet in the field, it accurately covers some of the places I am already familiar with.
