Stockpiling For Disaster: A Step-By-Step Beginner's Survival Guide On Storing Food, Water, Ammo, Fuel, And Other Important Items For The End Of The World

Synopsis

To ask yourself why to stockpile is to also ask how wide you dare open your eyes. For most of society they operate in a world with their eyes nearly shut. They see the things they want and block out the things they don't want to see. This method can keep you ignorant and happy until reality comes and stands right in front of you. Americans are at risk from a number of issues that directly affect them. The influx of illegal aliens from many nations is bringing in radicals and gang members that are killing and raping on a weekly basis. Some of the stories only make local news but this is happening in many places across the nation. The financial system is buckling under the pressure to support America's aging population as well as the influx of illegals that cannot speak or write English. The system is so imbalanced in fact that more than 100 million Americans are receiving government benefits of one kind or another. When this socialist experiment falls apart, like all do, there will be desperate people in the streets. Shelves will go bare and people will be looking for answers. Whether we are talking about natural disaster, war or the collapse of our own financial system it will give way to the desperate. The desperate are people who were dependent and unprepared. They have families, too. When their families are put at risk they will do whatever it takes to keep them safe and keep them fed. If this means steal your gun and your food it's just what they will try to do. The best way to avoid the desperate is to hold up in your home and live off the stockpile you have been building for months and months. You can board up your home and secure it. You may even consider operating at night during the worst waves of the desperate. In this guide, we are going to discuss the various items that make up a stockpile as well as how to build your own from scratch. This will assure you are prepared for the possibility of coming threats. The specific subjects that we will cover include the following:

- Stockpile From Scratch
- Water Stockpile
- Food Stockpile
- Hygiene and Sanitation
- Guns and Ammo
- First Aid
- Companion
- Variable Storage Locations

By the end of this guide, you will have a general idea of everything that you need to stockpile and how to stockpile it to ensure the survival of you and your family in a long term disaster scenario.

Customer Reviews

Excellent overview of everything you need to stockpile for emergencies. Definitely more aimed at beginners than experts, so if you're newer to prepping I think you'll find a lot of great information here.

Good quick read with common sense solutions.

This was a major disappointment. Nothing but a pamphlet. Only about 20 total pages. I am sure there is much more information on this subject.

Good common sense information. I was looking for a bit more.
