Amazing Truths: How Science And The Bible Agree

Synopsis

Are science and religion hopelessly at odds with one another in their view of truth? Â Not if you read physicist Michael Guillen's new book on truth, which shows that the two sources of truth, scientific and religious, are not opposed but in surprising agreement

Customer Reviews

I bought this book after engaging in some robust conversation with a non-believer. The non-believer friend started with the premise that science is objective fact, but the Bible is not fact and therefore cannot be believed. He thinks it takes faith to believe the Bible, but no faith is needed to believe science. I've read other works on the subject, but I found that this was outstanding in terms of showing that much of the body of work we call science is unknown and based on faith. As others have pointed out, I'm not sure this book will convince avid non-believers. But it should at least help people understand how logic (or lack thereof), intuition, and faith are foundations of modern science. Likewise, it shows that faith in the Bible is not in conflict with science, and therefore is not absurd. Our schools religiously (pun intended) teach our kids that things like evolution from one species to

another is scientific fact. I'd say that most people in western societies believe this, and therefore believe that it is absurd for a smart or logical person to believe in the Bible. But Dr. Guillen lays out very nicely that faith in the Bible is not only plausible, but also logical. To me, this Dr. Guillen does an outstanding job of showing logically that all believe systems - and even science itself - is based on faith. The agnostic is at least honest in saying he does not know, but has faith in his ability to know the truth when he finds it. The atheist has faith in science and in his own understanding of nothingness. Those two have far more faith than I do! For those that expect this book to finally convince them one way or the other, this book (nor the author) does not have that kind of power. As Dr. Guillen quotes from the 1 Cor 2:14 : "But a natural man does not accept the things of the Spirit of God, for they are foolishness to him; and he cannot understand them, because they are spiritually appraised." Understanding is a simple matter of faith, but it cannot come without that simple act of faith. I speak from experience as one who was "converted" as an adult after many years of not believing. The Bible describes this as being "born again". It is very much like that, since as soon as you believe, it is like putting on a pair of glasses. The whole world takes on a new meaning and perspective.

I love this book. Couldn't put it down. Brings the bible in line with science

I have really enjoyed reading this book! The title "Amazing Truths" is an accurate description of what you will discover reading this book.

Excellent presentation of complicated but vital truths to understand . Why not both science and God? God is unique and he has made us completely unique as well.

I am surprised that today we have so good reflexions about religion and science. No doubts it will continue for a long time and I hope we find some reasonable explanation for those subjects.

A very good and informative book. I feel better just for reading it. Thank you very much. You have done well.

This was a fair approach in terms of understanding how science and the Bible can be understood. A

timely reminder.
