Very pretty pictures. There's an added bonus of an extra small picture on the calendar side, so you get double beautiful skies. This calendar is also an astronomy nerd's dream. Just like holidays, it has significant astronomical events on it. I love this about it! The only downside to this calendar is you cannot write in pen or pencil on it. When I did this, the writing created a carbon copy-like transfer on to the page below it. I tested several different pens & pencils & tried to put zero pressure on the paper, but it still happened. The only writing utensil I've had success with was a fine tip

permanent marker. The marker tip is soft enough.

Calendar is decent, but the paper leaves marks on the pages beneath it. So if you write something on a date, it will be imprinted on the next month's page. Would not buy again.

I needed a calendar for the year and wanted to get something different from what I usually do and I'm glad I did. This has to be the highest quality wall calendar that I have ever owned. The pictures are gorgeous and detailed. Aside from the moon phases, which use a picture of the moon instead of just a circle, it also has other astronomical information such as eclipses, the position of planets, the equinoxes, the solstices, and meteor showers. I really appreciate all the pictures given that I can rarely get far enough away from the city lights to get a good look of the night sky. I didn't think that a calendar could actually impress me because it's just one of those items that you buy for practical reasons but this one changed my mind. I doubt I'll be tempted by other calendars next year.

This calendar has beautiful pictures. I like the little pictures showing the phases of the moon each month. I also like having reminders to look for events that will be happening in the sky.

Really beautiful calendar with little notations reminding you of not only holidays but also forecasted celestial events like eclipses and meteor showers.

Beautiful and unique photos. Paper is good quality and the size is large, although I wouldn't mind if they made it even a bit bigger. Still, I will definitely check them out again next year.

Nice pictures, really enjoying this calendar and would recommend pictures look fantastic and the boxes are big enough to write important info. Only downside was price hence why I gave it 4/5.

I get this calendar every year! It keeps me informed for the dates/times of astronomical events/perfect times to stargaze, and include some beautiful photos. I have tried other calendars but the others either had too much detail or not enough. Highly recommend!
