This book will be an excellent help for adults who are learning to use the abacus and to ultimately master mind math. The book introduces concepts one at a time, which helps in mastering abacus and increasing speed and accuracy effectively. Practicing mind math with this book will aid in your quest for mastery over mind math with effortless ease. Soroban, the Japanese abacus is a very useful visual tool that helps children understand numbers as beads while calculating. Soroban perfectly fits with the base 10 number system used at present and provides a systematic method (formulas) to follow while calculating both on the tool and in the mind. Mastering of this tool will enhance your child's basic math comprehension, speed and accuracy. In general, when children practice mind math, they get a very important sense of achievement that helps raise their confidence as students. You can also see an improvement in their concentration, tenacity, memory power and listening skills.

This is the second book for Level 2 of the SAI Abacus Mind Math study course. It provides 10 more weeks of practice math problems and mental exercises. It is well written and makes learning fun. As with all of the SAI books in this series it is well worth the price. Having this set of books is just like having your own private instructor. This is a workbook. To get the full benefit, you should also get the Level 2 Instruction Book. It covers the "how to do it" part of the course with easy to read and follow instructions. This course covers all the math stuff that is not being taught in the schools today. It's like a workout for the mind, but fun and easy to do. This is the best investment I've made in years. Highly recommended.

hubby's birthday gift!

These books are a gem. Provides lots of practice. There is Answer Key which is a great help for a parent.

Excellent book to use.

Good book
