# Fossils (True Books: Earth Science (Paperback))

## Synopsis

In the 4.6 billion years since Earth was formed, many plant and animal species have come and gone. Fossils are one of the most important tools we have for learning about long-extinct wildlife. Readers will discover how fossils are formed, how paleontologists search for them, and what kinds of information they can provide.

Ann O Squire is the author of several nonfiction books for children. --This text refers to an out of print or unavailable edition of this title.

Much smaller book then I expected

My son loves this book

perfect

My son loves this book.

My nephew loved it.

My granddaughter will love it. Thanks Sheila

My children loved this book when we studied dinosaurs and fossils. I am a Montessori teacher, so we do a lot of research into the history of our world.

Nice
