# Musculoskeletal Assessment: Joint Range Of Motion And Manual Muscle Strength

## **Synopsis**

Completely revised and updated, this edition presents the principles and methodology of assessing both joint range of motion (ROM)/goniometry and manual muscle strength for the head, neck, trunk, and extremities. Each chapter is devoted to a separate anatomical region and provides knowledge of pertinent surface anatomy and deep anatomy. Excellent photography and illustrations enhance comprehension of techniques and serve as a self-learning tool. New to this edition: New vertical format; second-color added to line art; 200 new photographs; detailed coverage of ROM and muscle length assessment and measurement for each body region; comprehensive coverage of end feels for each joint motion; and chapter relating assessment methods to treatment techniques and activities of daily living. A useful resource for assessment and treatment!

## **Book Information**

Series: Musculoskeletal Assessment

Spiral-bound: 432 pages

Publisher: LWW; Second edition (January 15, 2000)

## **Customer Reviews**

not what I thought it was. My fault I was disappointed. I thought (don't know why) it was more a physical therapy exercises book

Great!

This was purchased right before school started so I was nervous I wouldn't have it in time, but it came right before summer semester started. I was exactly what I was expecting for the price and

condition described online.

As a new ayoga therapist I am on the look out for information that will help me in mt journey, this book is just what I was looking for. it came before expected in the condition expected.

On time delivery and clean book...

Bought for school.

Great buy!!

Good textbook for the OT program. I like the spiral bound because it's easier to leave the book open while you're doing assessments.
