National Geographic Readers: Great Migrations Whales

Synopsis

Over the course of their 70-year lifespan, sperm whales will easily travel the circumference of the Earth in search of food and the need to breed and find a mate. Males will travel as far north as the Bering Sea and as far south as Antarctica in order to find enough food to sustain their ways of life. They can eat up to 700 squid a day! Along the way, these massive beasts battle 30-foot-long giant squids, and each other, to sustain their ways of life. National Geographic supports K-12 educators with ELA Common Core Resources. Visit www.natgeoed.org/commoncore for more information.

Book Information

Lexile Measure: 790L (What's this?)

Series: Readers

Paperback: 48 pages

Publisher: National Geographic Children's Books (October 12, 2010)

Language: English

ISBN-10: 1426307454

ISBN-13: 978-1426307454

Product Dimensions: 6 x 0.1 x 8.9 inches

Shipping Weight: 4 ounces (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars 48 customer reviews

Grade Level: 2 - 4

Customer Reviews

LAURA MARSH is a long time contributor to National Geographic Children Books. She has written a large number of books in National Geographic Readers series and also in Mama Mirabelle and Toot and Puddle series.

Being an ex children's librarian, I find reluctant reader's especially boys gravitate to these non fiction books, great for sight reading, I have my kids say all the words on the page they know then we

highlight them and place them together. There are many little people boys as well as girls that greatly benefit from non fiction books geared toward them and the subjects they love.

Colorful pictures and illustrations simply presented. A older toddler is given enough material to comprehend

I love all of the National Geographic Kids books! The text, maps, charts, information, and pictures are all so beautiful! This particular one- Whales, is fabulous! I have to credit this series for helping my students move on from 4 and 5-letter words to sounding out trickier words.

Never get enough about whales and my students loved it!

My granddaughter loved it. Thank you.

My four and a half year old son is in love with whales right now. In particular he wants to see pictures of whales. We got him this book for Christmas as a part of a whale themed package and I have to say it's great. There are lots of pictures and because it's geared for a young reader it a fairly short book so we are able to read it to him. I will note however that this book it only about sperm whales which worked great for us since he's interested in learning about all whales. However, if you are looking for a book that covers multiple types of whales you may want to keep on looking.

This book states that it is about whales...and it is but it only covers sperm whales. Still a wonderful resource, but only on one type of whale

We've bought a number of these to introduce our 3 year old daughter to non-fiction writing. The dolphins and sea turtles books are level 2, they're complex concepts but with mom or dad to help explain and discuss things while reading them to her its fine. This one however deals with the concept of migration, which even with mom and dad helping she just doesn't grasp. Its not the language thats the problem, but the concepts. Will be good when she's older.
