ICD-10-CM 2017 Snapshot Coding Card: Ophthalmology (ICD-10-CM 2017 Snapshot Coding Cards)

ICD-10-CM Snapshot 2017

Ophthalmology

Primary Coding Tip

If a different diagnosis has not been submitted to the end of the encounter, it is a signpost to report significant ocular pathology as a type of a definite diagnosis. Even if the clinical information is not shown or available about a particular final diagnosis to assign a new specific code, the appropriate "other" code (e.g., a diagnosis of glaucoma) has been submitted, but not the specific final diagnosis code (should be reported when they are the cause for test results reflects either a focus about the patient's condition at the time of that particular encounter).

The absence of the "other" code indicates that an additional code is needed. For example, **Glaucoma (H40.0)**
