Discover Nature In Water & Wetlands: Things To Know And Things To Do (Discover Nature Series)

Synopsis

"A wealth of information." --Booklist "A nice range of accessible information and activities." --Orion
Afield Wetlands provide perfect arenas for nature study. Discover Nature in Water and Wetlands explores the properties, processes, and phases of water and the plant and animal life associated with it, from trees, cattails, and ferns to dragonflies, salamanders, turtles, and beavers. With just a few essentials, such as a field notebook, hand lens, and bug box, readers will find both straightforward information and all kinds of activities to uncover the fascinating, diverse ecosystem that surrounds our ponds, swamps, and other watery places.

Product Dimensions: 6.1 x 0.7 x 9.1 inches

Shipping Weight: 11.2 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #275,695 in Books (See Top 100 in Books) #17 in [Books > Teens > Education & Reference > Science & Technology > Experiments & Projects](#) #39 in [Books > Science & Math > Nature & Ecology > Lakes & Ponds](#) #72 in [Books > Teens > Education & Reference > Science & Technology > Biology](#)

Customer Reviews

Elizabeth Lawlor is author of the Discover Nature series of books, which are illustrated by Pat Archer. Pat Archer is an experienced birder and artist living in Connecticut.

An excellent resource for educators and anyone interested in getting themselves and children involved in study of this vital ecological system. The text is easy to follow. The descriptions of the plant and animals and their communities is concise but sufficient to get one started in identification and in activities to cement that knowledge gained and to give anyone an appreciation for this vital but dwindling resource.
