Customer Reviews

I had to read this book for my interpreting license. As a whole the book was very long and drawn out. It was also somewhat confusing as it continually switched back and forth to the now

requirements and the past desired attitude toward interpreters. It was however informative and yes I would recommend it to another sign language interpreter.

I'm not an interpreter, but this book explained the nuances of Deaf culture and how it relates to other cultures. If you skip over the passages specific for interpreting, this is a wonderful resource for oral deaf adults familiarizing themselves with the cultural mores prevalent in the Deaf community.

This book entitled "Reading Between the Signs: Intercultural Communication for Sign Language Interpreters (2nd edition)" is the most indepth study of cultural mediation that I have ever seen. Anna Mindness does a wonderjful job of helping an interpreter to see where communication barriers exist, and then explain how to bridge those gaps. Why are cultures different? What is cultural mediation? How do you convey a message between conflicting cultures? What tools can effective interpreters use to empower the clients we serve toward better communication when obstacles exist? After reading this book, I found myself making adjustments in interpreting, and was able to see positive results in terms of faithfully communicating source language messages to the recipients. If one reads this book, and applies the principles learned toward their work, it will assist in making them a better interpreter, and ultimately a better communicator between cultures. I highly recommend this book to others and express my thanks to the author for putting the elements of intercultural communication together in one great volume.

Listen up ITP trainers! "Reading Between the Signs" is a true gem and should be required reading for all students in Interpreter Training Programs nationwide. Mindess and her publisher's copy editors possess the requisite skills to render a typographically error-free book with pleasing margins and fonts, unlike Alcorn and Humphrey's "So You Want to Be an Interpreter," a required text of many ITPs. Unlike Alcorn and Humphrey, who dutifully introduce and briefly discuss cross-cultural differences and how they influence sign language interpreting, Mindess thoughtfully and thoroughly takes the reader on an extended journey with deep, eye-opening analysis and a plethora of real-world examples that interpreters encounter every day. It's easy to understand the content with so many supporting examples of it throughout the text. Like an engaging movie, play, or book that requires the moviegoer, theatergoer, or reader to use his/her critical thinking skills and comparisons to one's own experiences to what s/he experiences in that particular media, Mindess' book goes by quickly, because the content is so well-developed and on-point. I found this book quite by accident. It was on a reading list of an online course I took to prepare for the NIC Knowledge Exam. I found it to

be extraordinarily helpful in filling in the gaps I had regarding cross-cultural communication between the hearing and Deaf communities. It answered a lot of questions I had and I felt much better having read it before taking the NIC Knowledge Exam (which I successfully passed). A must-have on your professional bookshelf!

Needed this for a college class. I still use it from time to time. Good reference book!

Good primer for the NIC written test. Great book to add to your reference library for future reference and discussion with colleagues you mentor.

Great book about the Deaf community

Great price, super fast shipping, exactly as described. Thank you!
