Common Core Assessments And Online Workbooks: Grade 3 Mathematics: PARCC Edition

Synopsis

This Lumos tedBook is updated to reflect 2017-18 PARCC assessment guidelines. It Includes: Two Summative Assessments (SA) Additional Questions by Type Concepts, Skills, Procedures Expressing Mathematical Reasoning Modeling / Applications Detailed answer explanations for every question Strategies for building speed and accuracy PLUS One Year access to Online Workbooks Hundreds of practice questions with detailed answers Anywhere Access! Learn using a smart phone, tablet or personal computer Self-paced and student-directed PLUS FREE Lumos StepUp Mobile App Scan QR Code in the book to instantly access online workbooks Convenient access to the Common Core State Standards PLUS FREE Lumos SchoolUp Mobile App Create and share School Stickies Educational Blogs, Common Core State Standards, Student Reports and More.. Schools (6000+), teachers (10,000+), libraries (30+) and parents (100,000+) throughout the United States use Lumos Study Programs to improve student achievement on the standardized tests. How can students succeed on the PARCC test using the Lumos Study Program? At Lumos Learning, we believe that year-long learning and adequate practice before the actual test are the keys to student success on the standardized tests. We have designed the Lumos Study Program to help students get plenty of realistic practice before the test and to promote year-long collaborative learning. Inside this book, you will find two full-length practice tests that are similar to the PARCC tests students will take to assess their mastery of CCSS aligned curriculum. Completing these tests will help students master the different areas that are included in newly aligned standardized tests and practice test taking skills. The results will help the students and educators get insights into students' strengths and weaknesses in specific content areas. These insights could be used to help students strengthen their skills in difficult topics and to improve speed and accuracy while taking the test. In addition, this book also contains a Practice Questions by Type. The Lumos Online Workbooks consist of hundreds of grade appropriate questions based on the CCSS. Students will get instant feedback and can review their answers anytime. Each student's answers and progress can be reviewed by parents and educators to reinforce the learning experience. What is PARCC? The Partnership for Assessment of Readiness and College and Careers (PARCC) is one of two state consortiums responsible for developing assessments aligned to the new, more rigorous Common Core State Standards. There are currently 20 states involved in the PARCC consortium and a combination of educational leaders from those states along with test developers are working together to create the new computer based English Language Arts and Math assessments. How is this Lumos tedBook aligned to PARCC Guidelines? Although the PARCC assessments will be conducted online, the practice tests

here have been created to accurately reflect the depth and rigor of PARCC tasks in a pencil and paper format. Students will still be exposed to the TECR technology style questions so they become familiar with the wording and how to think through these types of tasks.

Book Information

Paperback: 106 pages

Publisher: Lumos Learning (January 2, 2014)

Language: English

ISBN-10: 1940484189

Customer Reviews

The practice test workbook is useful. Since the PARCC was a brand new test for everyone, no one knew what to expect. It's good to have the practice tests so my 9yo has an idea what this test's about. The online practice tests are fun. My son liked the questions and did it well. He took the PARCC about 3 weeks ago. The tests took part in two days. Each lasted 75 minutes. My son said the first day test was long and difficult to him. He finished the test about 90%. The second day was easier and within his level. He finished the test without difficulty. His teacher claimed that it was pretty much the same feeling from his classmates. My son said the questions in the tests were similar to the workbook's, but some questions were longer and more difficult than the workbook's.

The workbooks are okay but the website keeps crashing between practice sessions. For the past two days I can barely get to the website and if I do it's timed out or doesn't for most times do anything at all!!!! pretty frustrating. My child had to retake tests several times as the webpage kept going into an error while submitting tests. I emailed the support team and there's been no reply.

Recently purchased Lumos Learning books for both Mathematics and ELA for PARCC preparation

for my 3rd grade kid from . He loves going through the material and what was most appealing to him was the online workbooks that are made available. With PARCC now online, this gives better practise than using paper and pen, and better simulation of the actual test. I would recommend this to all, for enriched learning and preparation for the PARCC.

Helped my kid in exam preparation.Good one.Online test prep option is the best.

My 8 year old daughter love this book and she practices the online workbooks too. It has lot to practice on . I believe its worth paying the money.

This workbook is a great resource for preparing students for the new PARCC. We are able to put practice questions on the Smart Board and go over with the whole class or put students on the classroom computers to practice on their own.

Great for assesments only - did not read the fine print that there are no lessons in it. I gove it 3 stars b/c I was unable to log on to the online workbooks as promised.

It's nice to be able to use the online workbooks, my son likes it.
